CERTIFICATE OF
GUARANTEE

DINAMICA® IS A 3rd GENERATION
ULTRA MICROFIBER TEXTILE.
IT HAS A SUEDE LOOK, IS SOFT TO THE
TOUCH AND HAS HIGH COMFORT VALUE.
IT BREATHES AND IS ANTISTATIC.
IT IS WASHABLE, EASY TO CLEAN AND
DOES NOT ATTRACT DIRT. IT USES
RECYCLED FIBERS AND IS RECYCLABLE.
DINAMICA® IS GUARANTEED FOR 10 YEARS.

The technical properties of Dinamica® allow the microfiber to be resistant and unchanged over time. However, in order to preserve the quality and the aspect of the fibres as long as possible, it is highly recommended to follow some simple rules of cleaning and maintenance.

MAINTENANCE

ORDINARY MAINTENANCE

In order to preserve the beauty of Dinamica® it is recommended that regular cleaning is carried out. Don't rub too vigorously, and we don't recommend using steam machines.

DAILY CLEANING

It is sufficient to dust Dinamica® using a soft brush, a dry cloth, or a vacuum cleaner.

WEEKLY CLEANING

After having dusted Dinamica®, run a slightly moistened white cotton cloth over it. Avoid the use of printed absorbent cloths/papers as they can release ink onto the material.

YEARLY CLEANING

If the upholstery is removable, it is recommended that you do not wash it in a washing-machine, following the instructions below (general washing instructions).

If the upholstery is not removable it is possible to clean Dinamica® by using specific products sold by Uninters S.p.A.

If such products are not available, please follow these instructions:
Dust the material with care; moisten a soft cloth or a sponge in clean water, wring it thoroughly and run it over the whole Dinamica® material, making sure not to wet it excessively; rinse the cloth or sponge and repeat as necessary. Leave to dry (overnight).
Once dried, in order to restore the material, brush it delicately with a soft bristle brush.

CARE AND CLEANING

Due to its natural characteristics, Dinamica® does not stain easily. It is however advisable to remove dust regularly using either a soft brush or vacuum cleaner. Wipe with a damp cloth, allow to dry then brush to raise the pile. For more thorough cleaning, proceed as follows:

Upholstered furniture with non-removable covers:

- Spray and rub the fabric with a dry foam upholstery cleaner.
- Brush to raise the pile.

STAIN REMOVAL

To remove small stains, please refer to our Stain Removal Checklist. Should you wish to use solvents not mentioned here, spot-test on a hidden area.

Whatever the stain may be, you have to:

1. act quickly;
2. start cleaning from outside of the stain towards its centre to avoid a halo effect;
3. identify the type of stain and proceed in accordance with our Stain Removal checklist;
4. if using a solvent, do not pour directly onto the fabric but onto a clean white cloth;
5. do not sit on the fabric or brush it until it is completely dry. When dry, use a soft brush to raise the pile.

STAIN REMOVAL CHECKLIST

Soft drinks - Spirits Wine: absorb as much as possible with kitchen paper, shampoo with water and mild detergent, then dab with diluted denatured alcohol (10%).

Ballpoint pen: clean with perchloroethylene or an enzyme based spot remover.

Coffee - Tea - Milk: absorb as much as possible with kitchen paper, then shampoo with water and mild detergent.

Chocolate - Sweets: sponge with warm water (max 60°C).

Paint. Oil colours: clean with turpentine, then shampoo with water and mild detergent. **Tempera colours:** fresh stain: clean with cold soapy water. **Old stain:** consult an expert.

Cosmetics: shampoo with water and mild detergent; for persistent stains use perchloroethylene or an enzyme based spot remover.

Grass - Vegetables: sponge with warm water then shampoo with water and mild detergent.

ink: use kitchen/blotting paper to absorb as much as possible, clean with a diluted solution of 20% denatured alcohol then shampoo with water and mild detergent.

Shoe polish: clean with perchloroethylene, an enzyme based spot remover or diluted ammonia (max 10%).

Jam - Syrup Fruit juice: remove as much as possible with a spoon, then dab clean with warm water.

Oil - Grease: sprinkle talcum powder over the stain, then brush the talc away and dab the stain with an enzyme based spot remover or diluted ammonia (max 10%).

Nail varnish: use nail polish remover on a clean cloth. For persistent stains use nitre diluent. Absorb as much as possible with kitchen paper, shampoo.
